Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Balderson et al. 3,845,870 in view of Weagley, 6,112,438.

Balderson et al. discloses a bucket (10) on a loader. Balderson et al. teaches that it is desirable that the bucket can hold more material (Column 1, lines 17-23). However, Balderson et al. does not disclose providing additional buckets attached to the sides of the main bucket.

Like Balderson et al., Weagley discloses a blade for moving material that moves more material. Unlike Balderson et al., Weagley teaches providing additional blades (10L, 10R) pivotally attached to the main blade (10) will allow the plow to move more material. The additional blades are similar to the main blade and are pivotally attached by hinges 25.

Regarding claim 3-4, 6, 9-10, 12 and 16-17, the bucket in Weagley has a locking means including two cylinder members (30, 32) and a pin (34).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
